Comments on Democratic Unionist Party submission:

As a community development worker that incorporates the Dundonald and Ballybeen area, I am absolutely appalled at the lack of consideration given to the residents who live in this area, when it comes to boundary changes.

First the council moves them to Lisburn and now this proposal wants them split and then moved again to two other areas. This community feel already like the poor relations this change could not be for the better of the community that representatives are meant to serve.

Disgusting measures that seriously need to be left alone, if its not broke don't fix it!
